1 Check the Inventory. Be sure the Batteries are fully charged.

2 Insert a fully charged Battery into the NP Box and close lid. Clip the bag closed, allowing the Power Cord to hang out of the bag on the right hand side.

3 Put on the Backpack and adjust the straps to a comfortable fit.

4 Reach into the Costume leg and find the elastic cuff. Step foot into the cuff so that the top elastic sits at the knee, and the bottom elastic is secure at the ankle.

5 Place the wearer's foot into the Shoe Base. Secure the wearer's shoe in the sandal with the velcro.

6 Attach the velcro on the Shoe Base to the velcro on the Costume, making sure to line up the center front and the center back. This should be a snug fit.

7 Locate the three Support Strap connected to the Waist Hoop. Clip each strap to the clips located across the top of the Backpack. This will help to support the weight of the Costume.

8 Pull the front of the Body up over the wearers head and plug the Power Cord attached to the Backpack into the Y Cable. The fans should begin to run. Zip the Costume closed. It should fully inflate in 30 to 45 seconds.

9 Put on the Jacket. Fasten the snaps on the collar of the Jacket to the Body on each shoulder and in the back.

10 Velcro the Jacket closed at the top of the Shirt and the bottom of the Jacket.

11 Put on the Hat. Fasten the snaps on the Hat to the snaps on the head.

12 Papa Duck is now ready to entertain.

Once the Costume is inflated, have the wearer check the visibility.

The best visibility can be achieved by adjusting the length of the Support Straps.

If the viewing area is too low, shorten the Support Straps which will raise the viewing area.

If the viewing is too high, lengthen the Support Straps which will drop the viewing area.
