1 Be sure the Batteries are fully charged.

2 Put on the Electrical Vest and tighten the front closures as needed.

3 Insert a fully charged Battery onto the V-Mount plate.

Place the V-Mount into the pocket located on the back of the Electrical Vest and snap closed.

4 Reach into the Costume leg and find the elastic cuff.

Step into the cuff and pull up so the bottom elastic is secure at the ankle.

5 Inside the Body there are two Support Straps attached to the Body. Clip these straps to the shoulders of the Electrical Vest.

The wearer will feel the weight of the costume on his/her shoulders.

6 Have the wearer hold Body off the floor.

Help place the wearer's feet on the Shoe Bases.

Secure the wearer's feet into the sandals with the Velcro.

7 Attach the Velcro on the Shoe Bases to the Velcro on the costume, making sure to line up the center front and center back.

This should be a snug fit. Adjust so that the Boots have a full shape.

8 Locate the Y-Cable inside the Costume and the V-Mount. Plug the Y-Cable into the V-Mount.
The Fans should begin to run.
If the Fans don't start, check the connection between the V-Mount and Y-Cable. Then try a different Battery

9 Pull the Body over the wearers head.

Make sure the wearers arms are through the Support Strap and then into the armholes.

10 Zip the Body closed and let it inflate.

Inflation takes about 45 second.

11 Put on the Shirt.

Snap the Shirt on at the back of the neck to secure the Shirt.

12 Locate the velcro attachments on the neck and waist of the Body.

Attach the corresponding velcro on the Shirt to the Body.
