1 Check the Inventory. Make sure the Batteries are Fully charged.

2 Insert a fully charged Battery into the V-Mount Plate. Secure the Battery and slide the V-Mount Plate into the back pocket of the Vest. Allow the Power Cord to hang out of the pocket on the right hand side.

3 Put on the Vest and clip the front buckles.

4 Slide the PVC Pipes into the pockets located on the back of the Vest.

5 Insert the Pins on the sides of the Pipes into the holes on the Pipes. This controls the height and visibility of the Costume. Make sure to push the Pins through to the other side of the Pipes until they clicks into place.

6 Step into the Costume. Reach into the Costume leg and locate the elastic cuff. Slide foot into the cuff so that the top elastic sits at the knee and the bottom elastic is secure at the ankle.

7 Locate the Shoulder/Neck Strap on the inside of the Costume. Fasten the clip to secure it in place.

8 Place the wearer's foot into the Shoe Base. Secure the wearer's shoe into the sandal by fastening the velcro.

9 Attach the velcro on the Shoe Base to the velcro on the Costume making sure to line up the center front and the center back. This should be a snug fit.

10 Insert the Extension Frame into the head of the costume. Attach the top of the Frame Extension to the velcro tabs inside the head of the costume. The bend of the Extension Frame should be facing forward.

11 Plug the Power Cord into the Y-Cable in the Costume. The Fans should begin to run.

12 Pull the Costume over the wearer's head. Slide the Frame Extension into the pipes on the back of the Vest.

13 Fasten the zipper and velcro.

Costume inflation should take approximately 45 seconds.

14 Alligator is now ready to entertain!

Optional clothing:

Safari Hat and Jacket

Baseball Uniform w/
Red Tennis Shoes

Hawaiian Shirt and
Shorts w/Blue Tennis
Shoes

Once the costume is inflated, have the wearer check the visibility.

The best visibility can be achieved by adjusting the length of the Support Straps.

If the viewing area is too low, shorten the Support Straps which will raise the viewing area.

If the viewing is too high, lengthen the Support Straps which will drop the viewing area.

The Frame Extension should be raised and lowered, with the adjustments of the Support Straps, by moving the pegs up and down the Pipes.

BUT the weight of the Body should not be held by the Frame Extension.
