Costume Specialists

**1** Check the Inventory. Be sure the Batteries are fully charged.

**2** Insert a fully charged Battery onto the V-Mount Plate and slide it into the Bag on the back of the Backpack. Clip the Bag closed, allowing the Power Cord to hang out of the Bag on the right hand side.

**3** Put on the Backpack and clip waist belt closed. Adjust straps so they fit comfortably, just above the hips.

**4** Reach into the Costume leg and find the Elastic Cuff. Step foot into the cuff so that the top Elastic sits at the knee, and the bottom Elastic is secure at the ankle.

**5** Place the wearer's foot into the Shoe Base. Secure the wearer's shoe in the sandal with the velcro.

**6** Attach the velcro on the Shoe Base to the velcro on the Costume, making sure to line up the center front and the center back. This should be a snug fit.

**7** Inside the Costume there are three straps attached to a Hoop at the waist. Clip the two front straps to the top of the Backpack at each side. Adjust the straps at the top of the Backpack to achieve the appropriate height. These straps hold the weight of the Costume.

**8** Clip the back strap to the top of the Backpack at the center back.

**9** Adjust the Straps to adjust the height of the Costume. This may have to be done by the wearer once inside the Costume.

**10** Plug Power Cord on Backpack into Y-Cable.

**11** Pull the Costume over the wearer and the Backpack. Zip and velcro the Costume closed. Let the Costume inflate.

*Inflation takes approximately 45 seconds!*

**12** Snap the Tail closed.

## Wearing Instructions For

# White Bear

**13** Snap Bow Tie to body.

**14** Snap Vest to body.

**15** The Bear can also be worn without clothing.

(If Bear is wearing other garments, put them on at this time as alternate clothing.)

**16** White Bear is now ready to entertain!

**Once the Costume is inflated, have the wearer check the visibility.**

**The best visibility can be achieved by adjusting the length of the Support Straps.**

**If the viewing area is too low, shorten the Support Straps which will raise the viewing area.**

**If the viewing is too high, lengthen the Support Straps which will drop the viewing area.**
