- This costume is designed to be worn by someone of an average build, reasonable strength and stamina. The wearer should be approximately 5'4" to 5'8" tall.
- The costume **MUST** be worn **WITH** shoes. T-shirt and shorts are best worn under the costume. It's advisable that the wearer drink plenty of liquids before and after the event.
- Make sure the batteries are fully charged. Each battery takes about 2 hours to fully charge.
- Be sure to have a dress rehearsal. It takes two people about 10 to 15 minutes to put on the costume. Becoming comfortable in the costume before the event will ensure the best performance.
- HAVE FUN!**

Wearing Instructions For **DOLPHIN**

1 Check the inventory and make sure the batteries are fully charged.

Press the button located on the side of the battery to indicate how much life is left in the battery.

2 Insert a fully charged battery onto the V-Mount plate. Slide the V-Mount plate into the pocket on the back of the electrical vest. Fasten the pocket closed, allowing the power cord to hang out of the right side of the pocket.

3 Put on the electrical vest and fasten the clips.

Tighten the straps across the chest as needed for comfort and support.

4 Reach into the costume legs and locate the elastic cuffs.

Step into each cuff so that the top elastic sits at the knees, and the bottom elastic is secure at the ankles.

5 Locate the three straps attached to the hoop. Clip the two front straps to the clips on the shoulders of the vest and clip the back strap to the clip on the center back shoulder of the vest.

This will help support the weight of the costume while the shoe bases are put on.

6 Put on the shoe bases.

Place the wearer's feet in the sandal of the shoe bases. Secure the wearer's shoes in the sandal with the Velcro.

This costume MUST be worn with shoes!

Wearing Instructions For **DOLPHIN**

7 Attach the velcro on the costumes feet to the velcro on the shoe bases. Making sure the center front and the center back are lined up.

This should be a snug fit.

8 Pull the body over the wearer. Guide the ends of the frame extension into the pipes on the vest. Insert the pins attached to the pipes into the nearest hole to adjust the height of the costume.

The weight of the body should rest on the support straps NOT the frame extension.

9 Plug the Y-cable located in the body to the V-mount cable hanging from the electrical vest pocket.

The fans should begin to run.

If not, check the Y-Cable connection to the V-Mount, the Y-Cables connections to the fans and if the battery's fully charged.

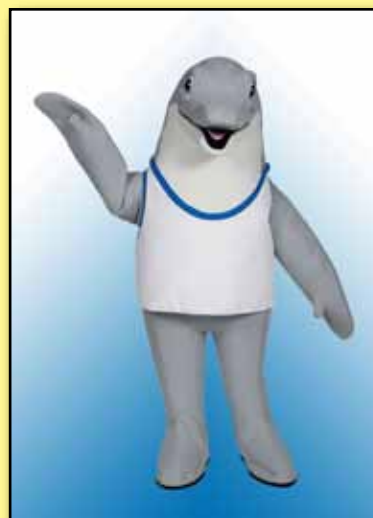

10 Zip the costume closed and snap the tail across the zipper allow to inflate.

Inflation takes approximately 45 seconds.

11 Put on the shirt. Make sure to remove the fabric cover the velcro on the shirt fan holes. Secure the fan holes on th shirt around the fan holes on the body and snap the Shirt closed.

12 Dolphin is now ready to entertain!

DOLPHIN

Frame Extension & Support Strap Adjustments

Once the costume is inflated, have the wearer check the visibility. The best visibility can be achieved by adjusting the length of the support straps.

- If the viewing area is too low, shorten the support straps which will raise the viewing area.
- If the viewing is too high, lengthen the support straps which will drop the viewing area.
- The frame extension should be raised and lowered, with the adjustments of the support straps, by moving the pins up and down the pipes.
- The weight of the body should NOT be held by the frame extension.

Notice

After Washing or Spot Cleaning...

It is crucial that the Body and any clothing be completely DRY before the Electrical System is re-assembled and the Costume is WORN or STORED!
