**1** Check the Inventory. Make sure the Batteries are fully charged.

On the side of the Battery is a button push in to indicates how much life is left in the Battery.

**2** Insert a fully charged Battery into the V-mount Plate. Slide the Battery into the pocket on the back of the Backpack. Fasten the bag closed, allowing the Power Cord to hang out of the right side of the bag.

**3** Put on Socks and pull over knees. Put on the Backpack and clip belt around hips. Adjust belt to fit comfortably.

**4** Reach into the Costume leg and find the elastic cuff. Step foot into the cuff so that the top elastic sits at the knee, and the bottom elastic is secure at the ankle.

**5** Inside the Costume there are three straps attached to the Hoop at the waist. Clip the two front straps to the top of the Backpack at the side.

**6** Clip the back strap to the top of the Backpack at the center.

**7** Adjust the straps at the top of the Backpack to control the height and visibility of the Costume. This may have to be done once inside the Costume.

**8** Put on Shoe Covers. Let them rest around the ankles until the Shoe Bases are put on.

**9** Place the wearer's foot into the Shoe Base. Secure the wearer's shoe in the sandal with the velcro.

**10** Attach the velcro on the Shoe Base to the velcro on the Shoe Cover, making sure to line up the center front and the center back. This should be a snug fit.

**11** Plug the Power Cord on Backpack into the Y-Cable inside the Costume. The fans should begin to run.

**12** Attach two parts of Body with zipper. Pull Costume over wearer and Backpack. Zip Costume and let it inflate. Inflation takes about 45 seconds.

**13** Attach the  
Gloves to the  
Costume, over the  
hands.

**14** Christmas Elf  
is now ready to  
entertain!

**Once the Costume is inflated, have the wearer check the visibility.**

**The best visibility can be achieved by adjusting the length of the Support Straps.**

**If the viewing area is too low, shorten the Support Straps which will raise the viewing area.**

**If the viewing is too high, lengthen the Support Straps which will drop the viewing area.**
