### **PLEASE READ ALL INSTRUCTIONS BEFORE DRESSING THE WEARER!**

- ☐ This costume is designed to be worn by someone of a slim build, reasonable strength and stamina. The wearer should be approximately 5'6" to 5'10" tall.
- ☐ The costume **MUST** be worn **WITH** shoes. T-shirt and shorts are best worn under the costume. It's advisable that the wearer drink plenty of liquids before and after the event.
- ☐ Make sure the batteries are **FULLY** charged. Each battery takes about 2 hours to completely charge.
- ☐ Be sure to have a dress rehearsal. It takes two people about 10 to 15 minutes to put on the costume. Becoming comfortable in the costume before the event will ensure the best performance.
- ☐ **HAVE FUN!**

**1** Check the inventory and make sure the batteries are fully charged.

Press the button located on the side of the battery to indicate how much life is left in the battery.

**2** Insert a fully charged battery onto the V-Mount plate. Slide the V-Mount plate into the pocket on the back of the electrical vest. Fasten the pocket closed, allowing the power cord to hang out of the right side of the pocket.

**3** Put on the Electrical Vest and fasten the clips.

Tighten the straps across the chest as needed for comfort and support.

**4** Reach into the costume legs and locate the elastic cuffs.

Step into each cuff so that the top elastic sits at the knees, and the bottom elastic is secure at the ankles.

**5** Locate the three straps attached to the waist hoop. Clip the two front straps to the clips on the shoulders of the vest. Clip the back strap to the center back shoulder of the vest.

**This will help support the weight of the costume while the shoe bases are put on.**

**6** Put on the Shoe Bases.

Place the wearer's feet in the sandal of the Shoe Bases. Secure the wearer's shoes in the sandal with the Velcro.

**This costume MUST be worn with shoes!**

**7** Attach the velcro on the costumes Shoes to the velcro on the Shoe Bases. Making sure the center front and the center back are lined up.

This should be a snug fit.

**8** Plug the Y-cable located in the Body to the V-mount cable hanging from the Electrical Vest pocket.

The fans should begin to run.

If not, check the Y-Cable connection to the V-Mount, the Y-Cables connections to the fans and if the battery's fully charged.

**9** Pull the Body over the wearer. Zip the costume closed and allow to inflate.

Inflation takes approximately 45 seconds.

**10** Put on the Cape. Snap the Cape to the Body to secure it in place. The center back snap is opposite of the rest. This will assure that the Cape is on correct.

Next, give Esteban is Hobo Stick.

**11** Esteban is now ready to entertain!

## Support Straps Adjustments

Once the costume is inflated, have the wearer check the visibility. The best visibility can be achieved by adjusting the length of the support straps.

- If the viewing area is too low, shorten the support straps which will raise the viewing area.
- If the viewing is too high, lengthen the support straps which will drop the viewing area.

## Packing Instructions For

# Esteban

**1** Fold the Cape. Place the Cape, Batteries and Charger in the trunk as pictured.

**2** Fold the Duffel bag and place it in the trunk beside the Charger and Batteries as pictured.

**3** Put the Electrical Vest in on top of the Duffel Bag. Make sure the V-Mount is in the pocket on the back of the Electrical Vest.

**4** Put the Shoe Bases in the small dust bag and place them into the trunk as pictured.

**5** Next place the Hobo Stick into the trunk as pictured. This will help keep the Stick from being bent or crushed in the trunk.

**6** Fold the Body and put it in the large dust bag. Make sure all the air is out of the bag before placing it into the trunk. Then put the bag in the trunk as pictured.
