**1** Check the Inventory. Make sure the Batteries are fully charged.

Located on the side of the Battery is a button; press it to indicate how much life is left in the Battery.

**2** Insert a fully charged Battery into the V-mount Plate. Slide the Battery into the pocket on the back of the Vest. Fasten the bag closed, allowing the Power Cord to hang out of the right side of the bag.

**3** First decide which Hat your Penguin will wear.

Locate the corresponding snaps and snap on the Hat.

**4** Reach into the Costume leg and find the elastic cuff. Step foot into the cuff so that the top elastic sits at the knee, and the bottom elastic is secure at the ankle.

**5** Locate the three Straps attached to the Hoop. Clip the two front straps and then the back strap to the Vest. This will help support the weight of the Costume while the Shoe Bases are put on.

**6** The Straps can be adjusted by pulling the strap through the clip to tighten or loosen.

**7** Plug the Power Cord on the Vest into the Y cable. The Fans should begin to run.

**8** Zip the Body closed and let it inflate.

Inflation takes approximately 45 seconds.

**9** Place the wearer's foot into the Shoe Bases. Secure the wearer's shoe in the sandal with the velcro.

**10** Attach the velcro on the Shoe Base to the velcro on the costume, beginning at the heel and making sure to line up the center front and the center back. This should be a snug fit.

**11** Penguin with the Baseball Cap is now ready to entertain!

**12** Penguin with the Santa Hat is now ready to entertain!

Once the Costume is inflated, have the wearer check the visibility.

The best visibility can be achieved by adjusting the length of the Support Straps.

If the viewing area is too low, shorten the Support Straps which will raise the viewing area.

If the viewing is too high, lengthen the Support Straps which will drop the viewing area.
